SEGMENT 19 (cont'd)

on the fact that Phebe died in 1803, when redstone was in vogue, and her husband in 1832, when whitestone was more common. Identification as is based on Parker's numbering sequence.

Note 2: Identification is based on the numbering sequence in Parker's Survey and the proximity to her parents.

Note 3: The only unidentified marker is at Site 1. All of the individuals thought to be interred in this Segment were identified.
